

ENABLS

# Education and NBS - bending the curve for biodiversity

## The mission

Setting the basis of networking and collaboration to promote transdisciplinary dialogue and further embed and unfold Nature-Based Solutions (NBS) concepts and approaches within universities and vocational schools, the professional sphere and society at large.

## The approach

Creating Living Labs in 7 countries (DE, NL, FI, AT, LT, EL, CZ) - an integrative approach that combines transdisciplinary dialogue and multi-actor engagement at all levels of society, ensuring all 'voices' are heard and no one is left behind.

## The goal

Developing and upscaling new forms of teaching, learning and capacity-building to mainstream biodiversity and NBS in higher education and Technical and Vocational Education & Training (TVET).
